In the entire Arai Helmet Company, only 15 men make helmet shells.

only 15 men.

Imagine the knowledge, commitment, expertise, and fanatical attention to detail it must take to earn that right.

only 15 men.

You'd think there'd be hundreds of men and machines cranking out Arai shells for the world. But that's not what a rider who buys an Arai expects. An Arai rider expects handmade care and attention, and that's what you get. You can get mass-produced helmets anywhere. You get handmade ones here.

only 15 men.

Understand that these 15 have to make every shell for all of Arai's F-1, Indy car and NASCAR helmets, motorcycle racers and riders helmets for the whole planet. One at a time, by hand.

only 15 men.

It gets even better. Arai's obsession with excellence is so extreme that the composition of the resins used to bond the shell components can be changed several times in a single day — just to compensate for changes in ambient temperature, humidity and barometric pressure inside the factory that could affect the bonding properties. Yes, we're serious. Because a rider must be able to trust what's under Arai paint.

Finally, every single Arai shell is measured for thickness and weight to conform to Arai's rigorous tolerances. (No easy random or batch testing around here.)

The result of all this is that you get to wear one of the ones that makes it.  
(Put a price on that.)

Convince yourself at [www.AraiAmericas.com](http://www.AraiAmericas.com)

For a copy of Arai's new 40-page color catalog plus an Arai sticker pak, please send \$4.00 in cash or stamps (\$5.00 U.S. Currency if outside the U.S.) to Arai Americas, Inc., Dept. 15MEN2010, P.O. Box 9485, Daytona, FL 32120. Specifications subject to change without notice. ©2010 Arai Helmets.

The Official Helmet of the Daytona 200.

## Greetings from il Capo

I am sure you have noticed the last issue of Desmo Leanings is a little different. I am also sure you will notice that many of the bikes are owned by the same rider. Unfortunately, some folks who agreed to have their bike photographed either moved or were out of town when the photos needed to be taken. We had to resort to fill-in bikes. Actually the same model bike was used, just a different owner.

We plan on doing this again next year, and if you have a bike you would like to have considered, now is the time to start planning your photo shoot. Be careful to have a good background and not have a tree growing out of your gas tank. Also, make sure the lighting is even so that one side of the photo is not over or under exposed. Studio shots are fine, but Ducatis live to be ridden, so outside shots are great. Hopefully, the calendar will fill you with wonderful ideas for a nice photo shoot.

If you'd like your pride and joy photographed semi-professionally, feel free to contact Terry Wyse (photowyse@gmail.com) and make arrangements to have him shoot your bike (Terry shot several of the bikes for this calendar). As long as you're in the greater Charlotte area, he'd be happy to take the photo...and even if you're outside the area or the state, he might be willing to travel to accommodate you if it fits his schedule.

It would be best to have any submissions to me by no later than March 1, 2011. Earlier is fine, but we need a lot of time to do the calendar—this one took about three months longer than planned.

If you would like additional copies, they are available for a postage and handling charge of \$25 for up to ten. The reason for that is ten comfortably fit into a flat-rate Priority envelope.

For "full enjoyment" of the calendar, please remove the center spread so June's photo and calendar can be viewed correctly.

Jim

There's a reason why  
we own the word Superbike

**1098**

Combining our MotoGP and World Superbike technology, the 1098 Ducati Superbike is the most powerful bike ever produced, with the highest torque to weight ratio of any sport bike in the world. There's a reason why we own the word Superbike.

The new 1098 boasts the latest technology throughout, including first of its kind advanced data acquisition (DS) port and radial mount Brembo motorcycle brake calipers (gripping 320mm rotors). At 261 lbs. dry, with 160 hp, 90 ft lbs. of torque, the broad and accurate power band of a new, the 544 1098 Ducati 1098 speaks for itself. Find your local Ducati dealer at [www.ducati.com](http://www.ducati.com).

## Hypermotard 1100<sup>EVO</sup> Go Hyper!

The brand new Hypermotard 1100<sup>EVO</sup> further enhances the original concept of ruling the road. A new super-light dry weight of 379lb and an increase of power to 95hp is the result of an intense program of redesign and refinement. With a riding position that ensures total control, the exceptionally slim and incredibly light Hypermotard is ready to dominate every inch of asphalt.

## Ducati Performance Apparel: Meccanica Collection

Introduced in 1954, the Ducati Meccanica logo with its distinctive wing and laurel design pays homage to Ducati's Bologna home and proud heritage. The Ducati Meccanica apparel collection combines vintage details and contemporary styling in both technical riding gear and fashion garments for men and women. For the complete Ducati apparel line and to shop online, visit [store.ducatiusa.com](http://store.ducatiusa.com).
